

Dajcor Aluminum

**Your One-Stop Dual Source For Value
Added Aluminum Extrusion Solutions**

Our Commitment

Dajcor Aluminum Ltd. is a value-added extrusion supplier, focused and driven by the simple edict, "Take Care of the Customer". Dajcor Aluminum is committed to manufacturing excellence, quality and the highest standard of customer satisfaction.

Our Vision

Our vision statement is "Profiles to Your Imagination."

At Dajcor Aluminum Ltd. we believe this vision articulates versatility, aesthetic appeal, cost effectiveness, endless design opportunities, and creative freedom.

Our Facilities

We are your one-stop, dual-source aluminum extrusion supplier, with nearly 500,000 sq. ft. of combined manufacturing space. Our central locations in both Canada and the USA strategically position us to supply extruded, fabricated, and anodized aluminum components across North America.

What We Do

Design Support › Extrusion › Fabrication › Anodization

As your one stop supplier, we handle everything from the design support to delivery of your aluminum components. We eliminate the need for subcontractors, which means reduced lead times, fewer handling marks and defects, and fewer transportation costs for you.

Watch What We Do

Who We Serve

Dajcor Aluminum is well positioned to supply to the global marketplace. Markets include, but not limited to the following:

Automotive

Recreation

Transportation

Renewable Energy

Medical Equipment/Accessibility

Marine & Aerospace

Consumer Product Industries

Office Furniture/Wall Partition Systems

T-Slot Components

Plant Capabilities

Design

Our experienced design support team can assist with the most complex of extruded products across many areas of application. We'll help you reduce costs in post extrusion fabrication and machining by incorporating features that result in more efficient manufacturing of your aluminum components.

Extrusion

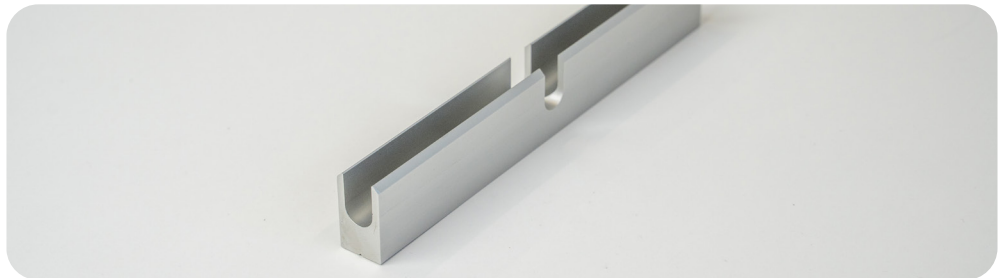

Dajcor extrudes primarily 6000 series alloys, 6063, 6463, 6061, 6005, 6082 and 6060. We also provide an extensive list of standard shapes and profiles. Our impressive combined roster of extrusion presses include two 9" 2800 ton, one 8" 2800 ton, and a 7" 1650 ton, with CCD capabilities up to 11".

Fabrication

Dajcor has full in-house fabrication and machining capability. Numerically controlled machining centres provide state-of-the-art capability for a wide range of precision production machining. Complete fabrication services include precision, tight tolerance cutting, tube laser cutting, mitering, notching, piercing, forming, bending, mechanical assembly and automated welding centres.

Anodization

Dajcor offers both acid and caustic etch stain finishes, including electrolytic colour anodizing, for lengths up to 28'. Many of our anodize finishes are approved to various automotive and military anodize standards. Dajcor also offers chemically bright anodizing in a wide range of standard and specialty colours, processed with our state-of-the-art automated anodize line, handling lengths up to 12'6". We also provide mechanical finishes such as buffing, brushing and deburring to complement our chemical finishing capabilities.
